

# M6500 Memory Card Duplicator

## *NEW Flash Memory Card Duplicator from the Industry Leader*

*Fast      Reliable      Versatile      Stand Alone      Easily Operated*

### Features

- **Eight Duplication Slots and One Master Card Slot** using low cost PCMCIA memory card adapters.
- **Fast Duplication** performed in parallel on all eight copy slots.
- **Binary Image Copy** allows the copy process to be independent of the operating system.
- **IMI's "Auto-ATA" function** performs automatic sizing and size checking of the master and copy cards.
- **Simple Stand Alone Operation** using the M6500 LCD and Front Panel Keys
- **Optional Windows compatible software** available for control of the M6500 using an RS232C port.

### Card Types Supported using PCMCIA Adapters

**PCMCIA ATA      Compact Flash      SD      MMC      XD**  
**MS      MSPRO      MSDuo      Smart Media**

**Note: Other types of cards are supported using additional adapters (e.g.: RSMMC, MiniSD, TF)**

**TEL: 408-942-1001 FAX: 408-942-1051**

**M6500 with Compact Flash Cards**

**M6500 with Secure Digital Cards**

**Included Front Panel Functions**

Copy master to copy cards  
Verify master against copy cards

Set up user job  
Copy log to USB drive

Set up card type  
Set up card parameters

**Computer Interface**

The M6500 has a standard RS232C port which allows connection to a standard Windows computer. An optional Windows XP Program is available for remote control of the M6500.

**Duplication Speed**

Duplication speed is independent of number of cards duplicated. The times quoted will vary widely both by card type and card manufacturer. The typical rate for fast CF cards is 300MB/min.
