VersaCopier3 provides a very affordable 3 writer desktop DVD/CD-R copying system in a small footprint. As the most versatile duplication system on the market today, VersaCopier3 offers you endless possibilities to automate your DVD/CD-R duplication.

The robust Center-Pick autoloading mechanism has provided hundreds of our customers with ease of use and trouble-free operation. The VersaCopier3 components are based on industrial design technology that will provide years of trouble-free operation.

The VersaBurner.Net software is optional and allow users on the network to submit CD/DVD duplication jobs from their desktop! Windows users can select image files, raw data or audio files, or premaster right from their PC's CD ROM reader to the VersaCopier3.

The VersaCopier3 comes standard with NEC® based 18XDVD/48X CD writers that are controlled with the powerful VersaBurner Recoding Software providing a smooth duplication process with trouble-free operation. In addition, the VersaCopier can support two choices of inkjet and two choices of thermal printers, the most versatile duplication system on the market.
